1990 *Journal of Thermophysics and Heat Transfer* Index

How to Use the Index

In the Subject Index, pages 536–539, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, page 540, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 541–544, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1990, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Fluid Dynamics

Boundary Layers and Heat Transfer—Laminar

Entropy Production in Boundary Layers T90-064
Flow Reversal and Heat Transfer of Fully Developed Mixed Convection in Vertical Channels T90-057
Computation of Convective Flow with Gravity Modulation in Rectangular Cavities T90-055
Multilayer Radiation Solution for Boundary-Layer Flow of Gray Gases T90-027
Thermophoretic Deposition in Crossflow over a Cylinder T90-016

Boundary Layers and Heat Transfer—Turbulent

Step Heat Flux Effects on Turbulent Boundary-Layer Heat Transfer T90-018
Unsteady Heat Transfer on Turbine Blades T90-006

Computational Fluid Dynamics

Computation of Solid/Liquid Phase Change Including Free Convection—Comparison with Data T90-056
Computation of Convective Flow with Gravity Modulation in Rectangular Cavities T90-055
New Parabolized Navier-Stokes Code for Three-Dimensional Chemically Reacting Flows T90-040
Comparison of Nonequilibrium Viscous-Shock-Layer Solutions with Shuttle Heating Measurements T90-025
Upwind Parabolized Navier-Stokes Code for Chemically Reacting Flows T90-023
Unsteady Heat Transfer on Turbine Blades T90-006
Parabolized Navier-Stokes Predictions of Three-Dimensional Hypersonic Flows with Strong Crossflow Effects T90-003

Hydrodynamics

Numerical Prediction of Convective Heat Transfer in Self-Sustained Oscillatory Flows T90-036

Hypersonic Flow

Rotational and Vibrational Nonequilibrium Effects in Rarefied Hypersonic Flow T90-078
New Parabolized Navier-Stokes Code for Three-Dimensional Chemically Reacting Flows T90-040
Comparison of Nonequilibrium Viscous-Shock-Layer Solutions with Shuttle Heating Measurements T90-025
Upwind Parabolized Navier-Stokes Code for Chemically Reacting Flows T90-023
Infrared Thermography in Blowdown and Intermittent Hypersonic Facilities T90-022
Survey of Simulation and Diagnostic Techniques for Hypersonic Nonequilibrium Flows T90-021
Parabolized Navier-Stokes Predictions of Three-Dimensional Hypersonic Flows with Strong Crossflow Effects T90-003

Inlet, Nozzle, Diffusor, and Channel Flows

Flow Reversal and Heat Transfer of Fully Developed Mixed Convection in Vertical Channels T90-057
Prediction of Two-Phase Flowfield in Ram Combustors T90-026
Behavior of High-Pressure Air in Critical-Flow Through Nozzles T90-004

Multiphase Flows

Subcooled Pool Film Boiling from a Cylinder and from a Sphere Placed in a Liquid Saturated Bed of Beads T90-037
Prediction of Two-Phase Flowfield in Ram Combustors T90-026

Rarefied Flows

Rotational and Vibrational Nonequilibrium Effects in Rarefied Hypersonic Flow T90-078
Direct Simulation of Chemical Reactions T90-059
Monte Carlo Simulation of Re-Entry Flows Using a Bimodal Vibration Model T90-043
Monte Carlo Simulations of Hypersonic Flows Past Blunt Bodies T90-024

Reacting Flows and Combustion

Direct Simulation of Chemical Reactions T90-059
Monte Carlo Simulation of Re-Entry Flows Using a Bimodal Vibration Model T90-043
New Parabolized Navier-Stokes Code for Three-Dimensional Chemically Reacting Flows T90-040
Monte Carlo Simulations of Hypersonic Flows Past Blunt Bodies T90-024
Upwind Parabolized Navier-Stokes Code for Chemically Reacting Flows T90-023

Separated Flows

Effects of Bottom Injection on Heat Transfer and Fluid Flow in Rectangular Cavities T90-084

Supersonic Flow

Dusty Supersonic Viscous Flow over a Two-Dimensional Blunt Body T90-086

Unsteady Flows

Unsteady Heat Transfer on Turbine Blades T90-006

Viscous Non-boundary-Layer Flows

Bénard-Marangoni Instability in a Two-Layer System with Uniform Heat Flux T90-010
Parabolized Navier-Stokes Predictions of Three-Dimensional Hypersonic Flows with Strong Crossflow Effects T90-003

Interdisciplinary Topics

Research Facilities and Instrumentation

Infrared Thermography in Blowdown and Intermittent Hypersonic Facilities T90-022

Launch Vehicle and Missile (LV/M) Technology

Thermal Protection Systems

Radiation from a Nongray Scattering, Emitting, and Absorbing Solid Rocket Motor Plume T90-074

Reacting Flows and Combustion

Direct Simulation of Chemical Reactions T90-059
Monte Carlo Simulation of Re-Entry Flows Using a Bimodal Vibration Model T90-043
New Parabolized Navier-Stokes Code for Three-Dimensional Chemically Reacting Flows T90-040
Monte Carlo Simulations of Hypersonic Flows Past Blunt Bodies T90-024
Upwind Parabolized Navier-Stokes Code for Chemically Reacting Flows T90-023

Separated Flows

Effects of Bottom Injection on Heat Transfer and Fluid Flow in Rectangular Cavities T90-084

Supersonic Flow

Dusty Supersonic Viscous Flow over a Two-Dimensional Blunt Body T90-086

Unsteady Flows

Unsteady Heat Transfer on Turbine Blades T90-006

Viscous Non-boundary-Layer Flows

Bénard-Marangoni Instability in a Two-Layer System with Uniform Heat Flux T90-010
Parabolized Navier-Stokes Predictions of Three-Dimensional Hypersonic Flows with Strong Crossflow Effects T90-003

Interdisciplinary Topics

Research Facilities and Instrumentation

Infrared Thermography in Blowdown and Intermittent Hypersonic Facilities T90-022

Launch Vehicle and Missile (LV/M) Technology

Thermal Protection Systems

Radiation from a Nongray Scattering, Emitting, and Absorbing Solid Rocket Motor Plume T90-074

Propulsion

Combustion and Combustor Designs

Experimental Mass Absorption Coefficients of Soot in Spray Combustor Flames T90-001

Droplet Characterization

Convective Evaporation of an Extremely Volatile Fuel Droplet T90-085

Ducted Rocket Engines

Prediction of Two-Phase Flowfield in Ram Combustors T90-026

Solid Rocket Motors and Missile Systems

Radiation from a Nongray Scattering, Emitting, and Absorbing Solid Rocket Motor Plume T90-074
Simple Method for Numerical Simulation of Temperature Response of the Solid Rocket Nozzle T90-005

Space Technology

Space Experiments

Computation of Convective Flow with Gravity Modulation in Rectangular Cavities T90-055

Space Processing

Transient Plumes from Convective Flow Instability in Horizontal Cylinders T90-054
Evaluation of Transport Conditions During Physical Vapor Transport Growth of Opto-Electronic Crystals T90-020
Bénard-Marangoni Instability in a Two-Layer System with Uniform Heat Flux T90-010

Spacecraft Structural Configuration, Design, and Analysis

Thermal Conductance of Cylindrical Joints —A Critical Review T90-031

Spacecraft Thermal Management

Diffusion-Controlled Startup of a Gas-Loaded Liquid-Metal Heat Pipe T90-052
Variable-Conductance Behavior in Two-Phase Binary Thermosyphons T90-051
Capillary Flow Properties of Mesh Wicks T90-050
Thermal Contact Conductance of Composite Cylinders: An Experimental Study T90-011

Structural Mechanics and Materials

Structural Composite Materials

Two-Dimensional Heat Transfer Through Complex-Shaped Composite Materials —Part II: Verification and Results T90-081
Two-Dimensional Heat Transfer Through Complex-Shaped Composite Materials Part I: Literature Review and Model Development T90-080

Thermal Effects

Thermal Contact Conductance of Composite Cylinders: An Experimental Study T90-011

Thermophysics and Heat Transfer

Ablation, Pyrolysis, Thermal Decomposition and Degradation

Analytical Investigation of the Thermal Response of Decomposing Polymer Composites T90-079
General Model for Thermochemical Ablation into a Vacuum T90-044
Three-Dimensional Conduction Effects During Scribing with a CW Laser T90-030
Simple Method for Numerical Simulation of Temperature Response of the Solid Rocket Nozzle T90-005

Aerothermodynamics/Thermal Protection

Analytical Investigation of the Thermal Response of Decomposing Polymer Composites T90-079
Radiation due to CO_2 or H_2O and Particles in Cylindrical Media T90-073
Direct Simulation of Chemical Reactions T90-059
Numerical Solution of Two-Dimensional Compressible Radiating Flowfields T90-045
General Model for Thermochemical Ablation into a Vacuum T90-044
Monte Carlo Simulation of Re-Entry Flows Using a Bimodal Vibration Model T90-043
Operating Characteristics of a 60- and 10-cm Electric Arc-Driven Shock Tube—Part II: The Driven Section T90-042
Operating Characteristics of a 60- and 10-cm Electric Arc-Driven Shock Tube—Part I: The Driver T90-041
Transient Radiative Heating of an Absorbing, Emitting, and Scattering Material T90-029
Comparison of Nonequilibrium Viscous-Shock-Layer Solutions with Shuttle Heating Measurements T90-025
Monte Carlo Simulations of Hypersonic Flows Past Blunt Bodies T90-024
Infrared Thermography in Blowdown and Intermittent Hypersonic Facilities T90-022
Survey of Simulation and Diagnostic Techniques for Hypersonic Nonequilibrium Flows T90-021
Comparison of Vibration-Dissociation Coupling and Radiative Transfer Models for AOTV/AFE Flowfields T90-002

Boiling/Condensation

Film Evaporation from a Micro-Grooved Surface—An Approximate Heat Transfer Model and Its Comparison with Experimental Data T90-083
Interferometric Observation of Phase-Change Phenomena Under Reduced Gravity T90-066
Hydrodynamics of Film Boiling from a Cylinder in Crossflow T90-060
Subcooled Pool Film Boiling from a Cylinder and from a Sphere Placed in a Liquid Saturated Bed of Beads T90-037

Computational Heat Transfer

Dusty Supersonic Viscous Flow over a Two-Dimensional Blunt Body T90-086
Convective Evaporation of an Extremely Volatile Fuel Droplet T90-085
Effects of Bottom Injection on Heat Transfer and Fluid Flow in Rectangular Cavities T90-084
Two-Dimensional Heat Transfer Through Complex-Shaped Composite Materials —Part II: Verification and Results T90-081
Two-Dimensional Heat Transfer Through Complex-Shaped Composite Materials Part I: Literature Review and Model Development T90-080
Collision Integrals and High Temperature Transport Properties for N-N, O-O, and N-O T90-077
New Numerical Method for Radiation Heat Transfer in Nonhomogeneous Participating Media T90-070
Entropy Production in Boundary Layers T90-064
Numerical Study of Two-Dimensional Freezing in an Annulus T90-062
Computation of Solid/Liquid Phase Change Including Free Convection—Comparison with Data T90-056
Transient Plumes from Convective Flow Instability in Horizontal Cylinders T90-054
Numerical Solution of Two-Dimensional Compressible Radiating Flowfields T90-045
Variable Specific Heat and Thermal Relaxation Parameter in Hyperbolic Heat Conduction T90-039
Numerical Prediction of Convective Heat Transfer in Self-Sustained Oscillatory Flows T90-036
Natural Convection in an Externally Heated Enclosure Containing a Local Heat Source T90-035
Free and Mixed Convection in Horizontal Porous Layers with Multiple Heat Sources T90-033
Adaptive Remeshing Method for Finite-Element Thermal Analysis T90-032
Three-Dimensional Conduction Effects During Scribing with a CW Laser T90-030
Thermal Correlation of Natural Convection in Bottom-Cooled Cylindrical Enclosures T90-019
Thermophoretic Deposition in Crossflow over a Cylinder T90-016
Two-Dimensional Convection and Radiation with Scattering from a Poiseuille Flow T90-014
Transient Combined Conduction and Radiation with Anisotropic Scattering T90-013
Numerical Investigation of Natural Convection Within Horizontal Annulus with a Heated Protrusion T90-009
Heat-Transfer Characteristics in Annuli with Blowing or Suction at the Walls T90-008
Simple Method for Numerical Simulation of Temperature Response of the Solid Rocket Nozzle T90-005

Electronics Cooling

Mixed Convection Transport from a Protruding Heat Source Module on a Vertical Surface T90-058
Natural Convection in an Externally Heated Enclosure Containing a Local Heat Source T90-035
Plume-Rise Effect on Natural Convection Heat Transfer in Staggered Arrays of Circular Heating Elements T90-034
Step Heat Flux Effects on Turbulent Boundary-Layer Heat Transfer T90-018
Interaction of Radiation and Free Convection on a Heated Vertical Plate: Experiment and Analysis T90-017

Numerical Investigation of Natural Convection Within Horizontal Annulus with a Heated Protrusion T90-009

Forced Convection

Effects of Bottom Injection on Heat Transfer and Fluid Flow in Rectangular Cavities T90-084
Temperature Transients in a Cylindrical Pressure Vessel Filled from Vacuum T90-082
Parallel-Flow and Counter-Flow Conjugate Convection from a Vertical Insulated Pipe T90-063
Hydrodynamics of Film Boiling from a Cylinder in Crossflow T90-060
Solution of an Elliptic Inverse Convection Problem Using a Whole Domain Regularization Technique T90-053
Two-Dimensional Anisotropic Scattering Radiation in a Thermally Developing Poiseuille Flow T90-046
Numerical Prediction of Convective Heat Transfer in Self-Sustained Oscillatory Flows T90-036
Multilayer Radiation Solution for Boundary-Layer Flow of Gray Gases T90-027
Step Heat Flux Effects on Turbulent Boundary-Layer Heat Transfer T90-018
Thermophoretic Deposition in Crossflow over a Cylinder T90-016
Two-Dimensional Convection and Radiation with Scattering from a Poiseuille Flow T90-014
Heat-Transfer Characteristics in Annuli with Blowing or Suction at the Walls T90-008

Heat Conduction

High-Temperature Thermal Diffusivity Determination Procedure for Solids and Liquids T90-076
Generalization of Some Improved Integral Methods for Transient Heat Conduction Problems T90-069
Parallel-Flow and Counter-Flow Conjugate Convection from a Vertical Insulated Pipe T90-063
Heat Transfer Across Aluminum/Stainless-Steel Surfaces in Periodic Contact T90-061
Deicing of Solids Using Radiant Heating T90-049
Interaction of Conduction and Radiation in Anisotropically Scattering, Spherical Media T90-047
Variable Specific Heat and Thermal Relaxation Parameter in Hyperbolic Heat Conduction T90-039
Adaptive Remeshing Method for Finite-Element Thermal Analysis T90-032
Thermal Conductance of Cylindrical Joints —A Critical Review T90-031
Transient Radiative Heating of an Absorbing, Emitting, and Scattering Material T90-029
Enclosure and Conductive Effects on Thermal Performance of Liquid Droplet Radiators T90-028
Thermal Correlation of Natural Convection in Bottom-Cooled Cylindrical Enclosures T90-019
Transient Combined Conduction and Radiation with Anisotropic Scattering T90-013
Emissivity Estimation Through the Solution of an Inverse Heat-Conduction Problem T90-012
Thermal Contact Conductance of Composite Cylinders: An Experimental Study T90-011

Heat Pipes

Film Evaporation from a Micro-Grooved Surface—An Approximate Heat Transfer Model and Its Comparison with Experimental Data T90-083
Diffusion-Controlled Startup of a Gas-Loaded Liquid-Metal Heat Pipe T90-052
Variable-Conductance Behavior in Two-Phase Binary Thermosyphons T90-051
Capillary Flow Properties of Mesh Wicks T90-050
Heat-Transfer Characteristics in Annuli with Blowing or Suction at the Walls T90-008

Laser Interaction

General Model for Thermochemical Ablation into a Vacuum T90-044
Three-Dimensional Conduction Effects During Scribing with a CW Laser T90-030

Melting/Solidification

Interferometric Observation of Phase-Change Phenomena Under Reduced Gravity T90-066
Numerical Study of Two-Dimensional Freezing in an Annulus T90-062
Computation of Solid/Liquid Phase Change Including Free Convection—Comparison with Data T90-056
Deicing of Solids Using Radiant Heating T90-049
Evaluation of Transport Conditions During Physical Vapor Transport Growth of Opto-Electronic Crystals T90-020

Mixed Convection

Mixed Convection Transport from a Protruding Heat Source Module on a Vertical Surface T90-058
Flow Reversal and Heat Transfer of Fully Developed Mixed Convection in Vertical Channels T90-057
Free and Mixed Convection in Horizontal Porous Layers with Multiple Heat Sources T90-033

Natural Convection

Natural Convection from Isothermal Plates Embedded in Thermally Stratified Porous Media T90-087
Interaction of Surface Radiation with Convection in Crystal Growth by Vapor Transport T90-075
Parallel-Flow and Counter-Flow Conjugate Convection from a Vertical Insulated Pipe T90-063
Mixed Convection Transport from a Protruding Heat Source Module on a Vertical Surface T90-058
Transient Plumes from Convective Flow Instability in Horizontal Cylinders T90-054
Natural Convection in an Externally Heated Enclosure Containing a Local Heat Source T90-035
Plume-Rise Effect on Natural Convection Heat Transfer in Staggered Arrays of Circular Heating Elements T90-034
Free and Mixed Convection in Horizontal Porous Layers with Multiple Heat Sources T90-033
Evaluation of Transport Conditions During Physical Vapor Transport Growth of Opto-Electronic Crystals T90-020
Interaction of Radiation and Free Convection on a Heated Vertical Plate: Experiment and Analysis T90-017
Bénard-Marangoni Instability in a Two-Layer System with Uniform Heat Flux T90-010
Numerical Investigation of Natural Convection Within Horizontal Annulus with a Heated Protrusion T90-009
Transient Heat-Transfer Studies in Low Gravity Using Optical Measurement Techniques T90-007

Nonintrusive Diagnostics

Interferometric Observation of Phase-Change Phenomena Under Reduced Gravity T90-066
Survey of Simulation and Diagnostic Techniques for Hypersonic Nonequilibrium Flows T90-021
Transient Heat-Transfer Studies in Low Gravity Using Optical Measurement Techniques T90-007

Radiation in Participating Media

Radiation from a Nongray Scattering, Emitting, and Absorbing Solid Rocket Motor Plume T90-074
Radiation due to CO_2 or H_2O and Particles in Cylindrical Media T90-073
Study of the Scattering Regime Diagrams T90-072
Exact Integral Formulation for Radiative Transfer in an Inhomogeneous Scattering Medium T90-071
New Numerical Method for Radiation Heat Transfer in Nonhomogeneous Participating Media T90-070
Attenuating Thin Gas T90-065
Entropy Production in Boundary Layers T90-064
Deicing of Solids Using Radiant Heating T90-049
Interference Effects on Scattering by Parallel Fibers at Normal Incidence T90-048
Interaction of Conduction and Radiation in Anisotropically Scattering, Spherical Media T90-047
Two-Dimensional Anisotropic Scattering Radiation in a Thermally Developing Poiseuille Flow T90-046
Numerical Solution of Two-Dimensional Compressible Radiating Flowfields T90-045
Emittance of a Finite Spherical Scattering Medium with Fresnel Boundary T90-038
Transient Radiative Heating of an Absorbing, Emitting, and Scattering Material T90-029
Enclosure and Conductive Effects on Thermal Performance of Liquid Droplet Radiators T90-028
Multilayer Radiation Solution for Boundary-Layer Flow of Gray Gases T90-027
Emittance Bounds for Transient Radiative Cooling of a Scattering Rectangular Region T90-015
Two-Dimensional Convection and Radiation with Scattering from a Poiseuille Flow T90-014
Transient Combined Conduction and Radiation with Anisotropic Scattering T90-013
Experimental Mass Absorption Coefficients of Soot in Spray Combustor Flames T90-001

Radiation Interchange Between Surfaces

High-Temperature Thermal Diffusivity Determination Procedure for Solids and Liquids T90-076
Interaction of Surface Radiation with Convection in Crystal Growth by Vapor Transport T90-075
View Factor Between Differing-Diameter, Coaxial Disks Blocked by a Coaxial Cylinder T90-068
Spectral Properties of Selected Superconducting Materials T90-067
Interference Effects on Scattering by Parallel Fibers at Normal Incidence T90-048
Interaction of Radiation and Free Convection on a Heated Vertical Plate: Experiment and Analysis T90-017
Emissivity Estimation Through the Solution of an Inverse Heat-Conduction Problem T90-012

Thermal Control

Film Evaporation from a Micro-Grooved Surface—An Approximate Heat Transfer Model and Its Comparison with Experimental Data T90-083
View Factor Between Differing-Diameter, Coaxial Disks Blocked by a Coaxial Cylinder T90-068
Spectral Properties of Selected Superconducting Materials T90-067
Variable-Conductance Behavior in Two-Phase Binary Thermosyphons T90-051
Capillary Flow Properties of Mesh Wicks T90-050
Interference Effects on Scattering by Parallel Fibers at Normal Incidence T90-048
Emittance of a Finite Spherical Scattering Medium with Fresnel Boundary T90-038
Plume-Rise Effect on Natural Convection Heat Transfer in Staggered Arrays of Circular Heating Elements T90-034
Adaptive Remeshing Method for Finite-Element Thermal Analysis T90-032
Thermal Conductance of Cylindrical Joints —A Critical Review T90-031
Enclosure and Conductive Effects on Thermal Performance of Liquid Droplet Radiators T90-028
Emittance Bounds for Transient Radiative Cooling of a Scattering Rectangular Region T90-015

Thermal Modeling and Analysis

Temperature Transients in a Cylindrical Pressure Vessel Filled from Vacuum T90-082
Two-Dimensional Heat Transfer Through Complex-Shaped Composite Materials —Part II: Verification and Results T90-081
Two-Dimensional Heat Transfer Through Complex-Shaped Composite Materials Part I: Literature Review and Model Development T90-080
Analytical Investigation of the Thermal Response of Decomposing Polymer Composites T90-079
Interaction of Surface Radiation with Convection in Crystal Growth by Vapor Transport T90-075
Generalization of Some Improved Integral Methods for Transient Heat Conduction Problems T90-069
Attenuating Thin Gas T90-065
Solution of an Elliptic Inverse Convection Problem Using a Whole Domain Regularization Technique T90-053
Diffusion-Controlled Startup of a Gas-Loaded Liquid-Metal Heat Pipe T90-052
Interaction of Conduction and Radiation in Anisotropically Scattering, Spherical Media T90-047
Comparison of Vibration-Dissociation Coupling and Radiative Transfer Models for AOTV/AFE Flowfields T90-002

Thermochemistry and Chemical Kinetics

Rotational and Vibrational Nonequilibrium Effects in Rarefied Hypersonic Flow T90-078
Collision Integrals and High Temperature Transport Properties for N-N, O-O, and N-O T90-077
Comparison of Vibration-Dissociation Coupling and Radiative Transfer Models for AOTV/AFE Flowfields T90-002

Thermophysical Properties

Collision Integrals and High Temperature Transport Properties for N-N, O-O, and N-O T90-077
High-Temperature Thermal Diffusivity Determination Procedure for Solids and Liquids T90-076
Study of the Scattering Regime Diagrams T90-072
Spectral Properties of Selected Superconducting Materials T90-067
Emittance of a Finite Spherical Scattering Medium with Fresnel Boundary T90-038
Thermal Correlation of Natural Convection in Bottom-Cooled Cylindrical Enclosures T90-019
Emittance Bounds for Transient Radiative Cooling of a Scattering Rectangular Region T90-015
Emissivity Estimation Through the Solution of an Inverse Heat-Conduction Problem T90-012
Experimental Mass Absorption Coefficients of Soot in Spray Combustor Flames T90-001

Chronological Index

T90-001 Experimental Mass Absorption Coefficients of Soot in Spray Combustor Flames. D. S. Babikian, D. K. Edwards, S. E. Karam, C. P. Wood and G. S. Samuelsen, *University of California, Irvine* (4, 1, p. 8) Article based on AIAA Paper 88-0539

T90-002 Comparison of Vibration-Dissociation Coupling and Radiative Transfer Models for AOTV/AFE Flowfields. Leland A. Carlson, Glenn J. Bobskill and Robert B. Greendyke, *Texas A&M University* (4, 1, p. 16) Article based on AIAA Paper 88-2673

T90-003 Parabolized Navier-Stokes Predictions of Three-Dimensional Hypersonic Flows with Strong Crossflow Effects. Bilal A. Bhutta and Clark H. Lewis, *VRA, Inc.* (4, 1, p. 27) Article based on AIAA Paper 88-2696

T90-004 Behavior of High-Pressure Air in Critical-Flow Through Nozzles. Bruno Schmidt, Richard Martin and Clifford House, *Southwest Missouri State University* (4, 1, p. 37) Article

T90-005 Simple Method for Numerical Simulation of Temperature Response of the Solid Rocket Nozzle. Timin Cai and Xiao Hou, *Northwestern Polytechnical University, China* (4, 1, p. 42) Article based on AIAA Paper 88-0083

T90-006 Unsteady Heat Transfer on Turbine Blades. Tuncer Cebeci, *California State University*; Robert J. Simoneau, *NASA Lewis Research Center*; and Max F. Platzer, *Naval Postgraduate School* (4, 1, p. 47) Article

T90-007 Transient Heat-Transfer Studies in Low Gravity Using Optical Measurement Techniques. Patricia J. Giarratano, A. Kumakawa and Vincent D. Arp, *National Institute of Standards and Technology*; and Robert B. Owen, *Optical Research Institute* (4, 1, p. 53) Article based on AIAA Paper 88-0346

T90-008 Heat-Transfer Characteristics in Annuli with Blowing or Suction at the Walls. Amir Faghri, *Wright State University* (4, 1, p. 59) Article

T90-009 Numerical Investigation of Natural Convection Within Horizontal Annulus with a Heated Protrusion. Shen-Min Liang, *National Cheng Kung University, Taiwan, ROC*; and Jyong-Jing Jiang, *Chung Shan Institute of Science and Technology, Taiwan, ROC* (4, 1, p. 67) Article based on AIAA Paper 88-0658

T90-010 Bénard-Marangoni Instability in a Two-Layer System with Uniform Heat Flux. H. Q. Yang and K. T. Yang, *University of Notre Dame* (4, 1, p. 73) Article

T90-011 Thermal Contact Conductance of Composite Cylinders: An Experimental Study. C. V. Madhusudana and A. L. Litvak, *University of New South Wales, Australia* (4, 1, p. 79) Article based on AIAA Paper 88-2659

T90-012 Emissivity Estimation Through the Solution of an Inverse Heat-Conduction Problem. J. F. Sacadura and T. T. Osman, *Institut National des Sciences Appliquées de Lyon, France* (4, 1, p. 86) Article

T90-013 Transient Combined Conduction and Radiation with Anisotropic Scattering. Jen-Hui Tsai and Jenn-Der Lin, *National Chiao Tung University, Taiwan, ROC* (4, 1, p. 92) Article

T90-014 Two-Dimensional Convection and Radiation with Scattering from a Poiseuille Flow. M. Kassemi and B. T. F. Chung, *University of Akron* (4, 1, p. 98) Article

T90-015 Emittance Bounds for Transient Radiative Cooling of a Scattering Rectangular Region. Robert Siegel, *NASA Lewis Research Center* (4, 1, p. 106) Article

T90-016 Thermophoretic Deposition in Crossflow over a Cylinder. Vijay K. Garg and S. Jayaraj, *Indian Institute of Technology* (4, 1, p. 115) Technical Note based on AIAA Paper 88-0656

T90-017 Interaction of Radiation and Free Convection on a Heated Vertical Plate: Experiment and Analysis. B. W. Webb, *Brigham Young University* (4, 1, p. 117) Technical Note

T90-018 Step Heat Flux Effects on Turbulent Boundary-Layer Heat Transfer. Robert P. Taylor, Philip H. Love, Hugh W. Coleman and M. H. Hosni, *Mississippi State University* (4, 1, p. 121) Technical Note

T90-019 Thermal Correlation of Natural Convection in Bottom-Cooled Cylindrical Enclosures. Shou-Shing Hsieh, *National Sun Yat-Sen University, Taiwan, ROC* (4, 1, p. 123) Technical Note

T90-020 Evaluation of Transport Conditions During Physical Vapor Transport Growth of Opto-Electronic Crystals. N. B. Singh and R. Mazelsky, *Westinghouse R&D Center*; and M. E. Glicksman, *Rensselaer Polytechnic Institute* (4, 1, p. 126) Technical Note based on AIAA Paper 89-0229

T90-021 Survey of Simulation and Diagnostic Techniques for Hypersonic Nonequilibrium Flows. Surendra P. Sharma and Chul Park, *NASA Ames Research Center* (4, 2, p. 129) Survey Paper based on AIAA Paper 87-0406

T90-022 Infrared Thermography in Blowdown and Intermittent Hypersonic Facilities. G. Simeonides, P. Van Lierde, S. Van der Stichele, D. Capriotti and J. F. Wendt, *von Kármán Institute for Fluid Dynamics, Belgium* (4, 2, p. 143) Article based on AIAA Paper 89-0042

T90-023 Upwind Parabolized Navier-Stokes Code for Chemically Reacting Flows. John C. Tannehill, John O. Ievalts and Philip E. Buelow, *Engineering Analysis, Inc.*; Dinesh K. Prabhu, *Eloret Institute*; and Scott L. Lawrence, *NASA Ames Research Center* (4, 2, p. 149) Article based on AIAA Paper 88-2614

T90-024 Monte Carlo Simulations of Hypersonic Flows Past Blunt Bodies. W. Wetzel and H. Oertel Jr., *German Aerospace Research Establishment (DLR), FRG* (4, 2, p. 157) Article

T90-025 Comparison of Nonequilibrium Viscous-Shock-Layer Solutions with Shuttle Heating Measurements. R. A. Thompson, *NASA Langley Research Center* (4, 2, p. 162) Article based on AIAA Paper 87-1473

T90-026 Prediction of Two-Phase Flowfield in Ram Combustors. D. Albagli and Y. Levy, *Technion, Israel* (4, 2, p. 170) Article

T90-027 Multilayer Radiation Solution for Boundary-Layer Flow of Gray Gases. H. S. Lee and J. A. Menart, *University of Minnesota*; and A. Fakheri, *Bradley University* (4, 2, p. 180) Article based on AIAA Paper 89-0604

T90-028 Enclosure and Conductive Effects on Thermal Performance of Liquid Droplet Radiators. Yildiz Bayazitoglu and Peter D. Jones, *Rice University* (4, 2, p. 186) Article

T90-029 Transient Radiative Heating of an Absorbing, Emitting, and Scattering Material. W. W. Yuen and M. Khatami, *University of California at Santa Barbara*; and G. R. Cunnington Jr., *Lockheed Missiles & Space Company, Inc.* (4, 2, p. 193) Article based on AIAA Paper 87-1488

T90-030 Three-Dimensional Conduction Effects During Scribing with a CW Laser. Subhransu Roy and Michael F. Modest, *Pennsylvania State University* (4, 2, p. 199) Article based on AIAA Paper 89-0179

T90-031 Thermal Conductance of Cylindrical Joints—A Critical Review. C. V. Madhusudana, *University of New South Wales, Australia*; L. S. Fletcher and G. P. Peterson, *Texas A&M University* (4, 2, p. 204) Article

T90-032 Adaptive Remeshing Method for Finite-Element Thermal Analysis. Earl A. Thornton and Gururaja R. Vemaganti, *Old Dominion University* (4, 2, p. 212) Article

T90-033 Free and Mixed Convection in Horizontal Porous Layers with Multiple Heat Sources. F. C. Lai, C. Y. Choi and F. A. Kulacki, *Colorado State University* (4, 2, p. 221) Article based on AIAA Paper 88-0659

T90-034 Plume-Rise Effect on Natural Convection Heat Transfer in Staggered Arrays of Circular Heating Elements. Kyung-Jin Choi and Soyoung Cha, *University of Illinois at Chicago* (4, 2, p. 228) Article

T90-035 Natural Convection in an Externally Heated Enclosure Containing a Local Heat Source. J. L. Xia, M. D. Xin and H. J. Zhang, *Chongqing University, China* (4, 2, p. 233) Article

T90-036 Numerical Prediction of Convective Heat Transfer in Self-Sustained Oscillatory Flows. Cristina H. Amon, *Carnegie Mellon University*; and Bora B. Mikic, *Massachusetts Institute of Technology* (4, 2, p. 239) Article

T90-037 Subcooled Pool Film Boiling from a Cylinder and from a Sphere Placed in a Liquid Saturated Bed of Beads. J. Orozco, D. Poulikakos and M. Gutjahr, *University of Illinois at Chicago* (4, 2, p. 247) Technical Note

T90-038 Emittance of a Finite Spherical Scattering Medium with Fresnel Boundary. Chih-Yang Wu and Chu-Jeng Wang, *National Cheng Kung University, Taiwan, ROC* (4, 2, p. 250) Technical Note

T90-039 Variable Specific Heat and Thermal Relaxation Parameter in Hyperbolic Heat Conduction. David E. Glass, *Analytical Services and Materials*; and D. Scott McRae, *North Carolina State University* (4, 2, p. 252) Technical Note based on AIAA Paper 89-0317

T90-040 New Parabolized Navier-Stokes Code for Three-Dimensional Chemically Reacting Flows. D. K. Prabhu and J. C. Tannehill, *Iowa State University*; and J. G. Marvin, *NASA Ames Research Center* (4, 3, p. 257) Synoptic based on AIAA Paper 87-1472

T90-041 Operating Characteristics of a 60- and 10-cm Electric Arc-Driven Shock Tube—Part I: The Driver. Surendra P. Sharma and Chul Park, *NASA Ames Research Center* (4, 3, p. 259) Article based on AIAA Paper 88-0142

T90-042 Operating Characteristics of a 60- and 10-cm Electric Arc-Driven Shock Tube—Part II: The Driven Section. Surendra P. Sharma and Chul Park, *NASA Ames Research Center* (4, 3, p. 266) Article based on AIAA Paper 88-0142

T90-043 Monte Carlo Simulation of Re-Entry Flows Using a Bimodal Vibration Model. David P. Olynick, *North Carolina State University*; James N. Moss, *NASA Langley Research Center*; and H. A. Hassan, *North Carolina State University* (4, 3, p. 273) Article based on AIAA Paper 89-0311

T90-044 General Model for Thermochemical Ablation into a Vacuum. Timothy K. Risch and Bernard Laub, *Acurex Corporation* (4, 3, p. 278) Article based on AIAA Paper 87-1515

T90-045 Numerical Solution of Two-Dimensional Compressible Radiating Flowfields. Yih-Kanq Chen, Philip L. Varghese and John R. Howell, *University of Texas at Austin* (4, 3, p. 285) Article based on AIAA Paper 89-0602

T90-046 Two-Dimensional Anisotropic Scattering Radiation in a Thermally Developing Poiseuille Flow. Tae-Kuk Kim and HaeOk Skarda Lee, *University of Minnesota* (4, 3, p. 292) Article based on AIAA Paper 89-1719

T90-047 Interaction of Conduction and Radiation in Anisotropically Scattering, Spherical Media. S. T. Thynell, *Pennsylvania State University* (4, 3, p. 299) Article based on AIAA Paper 89-0603

T90-048 Interference Effects on Scattering by Parallel Fibers at Normal Incidence. Susan M. White and Sunil Kumar, *NASA Ames Research Center* (4, 3, p. 305) Article based on AIAA Paper 89-1717

T90-049 Deicing of Solids Using Radiant Heating. B. Song and R. Viskanta, *Purdue University* (4, 3, p. 311) Article

T90-050 Capillary Flow Properties of Mesh Wicks. J. H. Ambrose and L. C. Chow, *University of Kentucky*; and J. E. Beam, *Air Force Wright Aeronautical Laboratories, Wright-Patterson AFB* (4, 3, p. 318) Article based on AIAA Paper 88-2649

T90-051 Variable-Conductance Behavior in Two-Phase Binary Thermosyphons. P. F. Peterson and K. Hijikata, *Tokyo Institute of Technology, Japan*; and C. L. Tien, *University of California, Irvine* (4, 3, p. 325) Article based on AIAA Paper 89-1746

T90-052 Diffusion-Controlled Startup of a Gas-Loaded Liquid-Metal Heat Pipe. R. Ponnappan, *Universal Energy Systems, Inc.*; L. I. Boehman, *University of Dayton*; and E. T. Mahefkey, *Wright Research and Development Center* (4, 3, p. 332) Article

T90-053 Solution of an Elliptic Inverse Convection Problem Using a Whole Domain Regularization Technique. A. Moutsoglou, *South Dakota State University* (4, 3, p. 341) Article

T90-054 Transient Plumes from Convective Flow Instability in Horizontal Cylinders. Foluso Ladeinde and K. E. Torrance, *Cornell University* (4, 3, p. 350) Article based on AIAA Paper 89-0170

T90-055 Computation of Convective Flow with Gravity Modulation in Rectangular Cavities. S. Biringen and G. Danabasoglu, *University of Colorado* (4, 3, p. 357) Article based on AIAA Paper 88-3727 CP888

T90-056 Computation of Solid/Liquid Phase Change Including Free Convection—Comparison with Data. G. E. Schneider, *University of Waterloo, Canada* (4, 3, p. 366) Article

T90-057 Flow Reversal and Heat Transfer of Fully Developed Mixed Convection in Vertical Channels. Chin-Hsiang Cheng and Hong-Sen Kou, *Tatung Institute of Technology, Taiwan, ROC*; and Taiwan, ROC Huang Wen-Hsiung, *Tatung Institute of Technology* (4, 3, p. 375) Article

T90-058 Mixed Convection Transport from a Protruding Heat Source Module on a Vertical Surface. B. H. Kang and Y. Jaluria, *Rutgers, The State University of New Jersey* (4, 3, p. 384) Article

T90-059 Direct Simulation of Chemical Reactions. I. D. Boyd and J. P. W. Stark, *University of Southampton, England, UK* (4, 3, p. 391) Technical Note

T90-060 Hydrodynamics of Film Boiling from a Cylinder in Crossflow. K.-H. Chang, *Imo Delaval, Inc.*; and Larry C. Witte, *University of Houston* (4, 3, p. 393) Technical Note

T90-061 Heat Transfer Across Aluminum/Stainless-Steel Surfaces in Periodic Contact. W. M. Moses and N. C. Dodd, *Texas A&M University* (4, 3, p. 396) Technical Note based on AIAA Paper 88-2646

T90-062 Numerical Study of Two-Dimensional Freezing in an Annulus. S. S. Sablani, S. P. Venkateshan and V. M. K. Sastri, *Indian Institute of Technology* (4, 3, p. 398) Technical Note

T90-063 Parallel-Flow and Counter-Flow Conjugate Convection from a Vertical Insulated Pipe. J. Libera and D. Poulikakos, *University of Illinois at Chicago* (4, 3, p. 400) Technical Note

T90-064 Entropy Production in Boundary Layers. Ahmet Selamet and Vedat S. Arpaci, *University of Michigan* (4, 3, p. 404) Technical Note

T90-065 Attenuating Thin Gas. V. S. Arpaci, *University of Michigan*; and J. S. Troy, *McDonnell Douglas Space Systems Company* (4, 3, p. 407) Technical Note

T90-066 Interferometric Observation of Phase-Change Phenomena Under Reduced Gravity. A. Iwasaki, S. Hosokawa, I. Kudo and M. Tanimoto, *Electrotechnical Laboratory, Japan*; S. Fujita and F. Takei, *Fujitsu Laboratories, Japan* (4, 3, p. 410) Technical Note based on AIAA Paper 89-1775

T90-067 Spectral Properties of Selected Superconducting Materials. L. S. Fletcher, G. P. Peterson and R. K. Pandey, *Texas A&M University*; and G. R. Cunnington, *Lockheed Research and Development* (4, 3, p. 412) Technical Note based on AIAA Paper 89-1674

T90-068 View Factor Between Differing-Diameter, Coaxial Disks Blocked by a Coaxial Cylinder. D. E. Bornside and R. A. Brown, *Massachusetts Institute of Technology* (4, 3, p. 414) Technical Note

T90-069 Generalization of Some Improved Integral Methods for Transient Heat Conduction Problems. H. S. Kou and N. W. Fan, *Tatung Institute of Technology, Taiwan, ROC* (4, 4, p. 417) Synoptic

T90-070 New Numerical Method for Radiation Heat Transfer in Nonhomogeneous Participating Media. Zhiqiang Tan and John R. Howell, *University of Texas at Austin* (4, 4, p. 419) Article

T90-071 Exact Integral Formulation for Radiative Transfer in an Inhomogeneous Scattering Medium. Chih-Yang Wu, *National Cheng Kung University, Taiwan, ROC* (4, 4, p. 425) Article

T90-072 Study of the Scattering Regime Diagrams. Kouichi Kamiuto, *Oita University, Japan* (4, 4, p. 432) Article

T90-073 Radiation due to CO_2 or H_2O and Particles in Cylindrical Media. S. T. Thynell, *Pennsylvania State University* (4, 4, p. 436) Article based on AIAA Paper 89-1718

T90-074 Radiation from a Nongray Scattering, Emitting, and Absorbing Solid Rocket Motor Plume. D. K. Edwards and D. S. Babikian, *University of California at Irvine* (4, 4, p. 446) Article

T90-075 Interaction of Surface Radiation with Convection in Crystal Growth by Vapor Transport. Mohammad Kassemi and Walter M. B. Duval, *NASA Lewis Research Center* (4, 4, p. 454) Article

T90-076 High-Temperature Thermal Diffusivity Determination Procedure for Solids and Liquids. Yildiz Bayazitoglu, P. V. R. Suryanarayana and Udaya B. Sathuvalli, *Rice University* (4, 4, p. 462) Article

T90-077 Collision Integrals and High Temperature Transport Properties for N-N, O-O, and N-O. E. Levin, H. Partridge and J. R. Stallcop, *NASA Ames Research Center* (4, 4, p. 469) Article

T90-078 Rotational and Vibrational Nonequilibrium Effects in Rarefied Hypersonic Flow. Iain D. Boyd, *Eloret Institute* (4, 4, p. 478) Article based on AIAA Paper 89-1880

T90-079 Analytical Investigation of the Thermal Response of Decomposing Polymer Composites. John Florio Jr., *Kaman Sciences Corporation*; and Jack B. Henderson, *University of Rhode Island* (4, 4, p. 485) Article

T90-080 Two-Dimensional Heat Transfer Through Complex-Shaped Composite Materials Part I: Literature Review and Model Development. T. E. Saliba and R. A. Servais, *University of Dayton* (4, 4, p. 493) Article

T90-081 Two-Dimensional Heat Transfer Through Complex-Shaped Composite Materials—Part II: Verification and Results. T. E. Saliba and R. A. Servais, *University of Dayton* (4, 4, p. 499) Article

T90-082 Temperature Transients in a Cylindrical Pressure Vessel Filled from Vacuum. David R. Dowling and Victor R. Buonadonna, *Boeing Aerospace and Electronics*; and Robert E. Breidenthal, *University of Washington* (4, 4, p. 504) Article

T90-083 Film Evaporation from a Micro-Grooved Surface—An Approximate Heat Transfer Model and Its Comparison with Experimental Data. X. Xu and V. P. Carey, *University of California, Berkeley* (4, 4, p. 512) Article

T90-084 Effects of Bottom Injection on Heat Transfer and Fluid Flow in Rectangular Cavities. Mingking K. Chyu, *Carnegie Mellon University*; and Stephen G. Schwarz, *Tulane University* (4, 4, p. 521) Article based on AIAA Paper 89-0427

T90-085 Convective Evaporation of an Extremely Volatile Fuel Droplet. M. Bussmann and M. Renksizbulut, *University of Waterloo, Canada* (4, 4, p. 527) Technical Note

T90-086 Dusty Supersonic Viscous Flow over a Two-Dimensional Blunt Body. R. Elangovan and H. V. Cao, *Boeing Airplanes* (4, 4, p. 529) Technical Note based on AIAA Paper 89-0686

T90-087 Natural Convection from Isothermal Plates Embedded in Thermally Stratified Porous Media. F. C. Lai, *Colorado State University*; I. Pop, *University of Cluj, Romania*; and F. A. Kulacki, *Colorado State University* (4, 4, p. 533) Technical Note

U.S. Postal Service

STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION

Required by 39 U.S.C. 3685)

1A. Title of Publication	1B. PUBLICATION NO.	2. Date of Filing
Journal of Thermophysics and Heat Transfer	0 0 0 7 6 5	11/2/90
3. Frequency of Issue	3A. No. of Issues Published Annually	3B. Annual Subscription Price
Quarterly	4	$20.00

4. Complete Mailing Address of Known Office of Publication *(Street, City, County, State and ZIP+4 Code) (Not printer)*

370 L'Enfant Promenade S.W., Washington, D.C. 20024

5. Complete Mailing Address of the Headquarters of General Business Offices of the Publisher *(Not printer)*

Same as above.

6. Full Names and Complete Mailing Address of Publisher, Editor, and Managing Editor *(This item MUST NOT be blank)*

Publisher *(Name and Complete Mailing Address)*

American Institute of Aeronautics and Astronautics, Inc. Same as above.

Editor *(Name and Complete Mailing Address)*

Alfred L. Crosbie -- Same as above.

Managing Editor *(Name and Complete Mailing Address)*

Heather Brennan -- Same as above.

7. Owner *(If owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding 1 percent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a partnership or other unincorporated firm, its name and address, as well as that of each individual must be given. If the publication is published by a nonprofit organization, its name and address must be stated.) (Item must be completed.)*
